SCRA and Oak Ridge National Labs ink accord

PRINT

April 23, 2009

CHARLESTON, SC - SCRA, a global leader in applied research and commercialization services and the Department of Energy's Oak Ridge National Laboratory (ORNL) announce the signing of a Memorandum of Understanding (MOU) to explore a wide range of collaborative opportunities in applied research, commercialization, and knowledge-based economic development.

SCRA brings deep domain expertise in technology-based economic development, advanced materials, alternative energy, homeland security, and health care technologies to the new partnership.

"We are pleased at the opportunities collaboration with ORNL will provide to commercialize technologies in South Carolina and globally," said Bill Mahoney, SCRA CEO.

ORNL brings a rich history of scientific research in support of the U.S. Department of Energy's mission, including neutron science, high-performance computing, biology, materials science and national security.

ORNL will share its unique capabilities to assist SCRA in growing the Knowledge Economy in South Carolina through both SCRA's internal operations and the SC Launch program.
